CombineCS The Extra Step

I CAN DO THIS

Rashmi Prabha  
CombineCS The Extra Step

Q1) Which of the following is dangling  
reference ?

- (i) Accessing the storage that is already disposed at users request.
- (ii) Accessing the storage that is already disposed at the request of processor.
- (iii) Accessing the variable that is declared but not initialized.
- (iv) ALL

Rashmi Prabha

Basic Concepts  
by  
alias

Q1) Which of the following is dangling reference ? | pointer → address

- (i) Accessing the storage that is already disposed at users request.
- (ii) Accessing the storage that is already disposed at the request of processor.
- ~~(iii)~~ Accessing the variable that is declared but not initialized. *programming*
- (iv) **ALL**

Rashmi Prabha

CombineCS The Extra Step

*References  
values*

Q2) In object oriented programming for references and values, which of the following statements are true :

- (i) If variables are references, then every object must be created explicitly.
- (ii) If variables are values, then object creation can happen implicitly as result
- (iii) Both
- (iv) None

Rashmi Prabha

CombineCS The Extra Step

*alias*

Q2) In object oriented programming for references and values, which of the following statements are true :

- (i) If variables are references, then every object must be created explicitly.
- (ii) If variables are values, then object creation can happen implicitly as result

*(iii) Both*

*(iv) None*

Rashmi Prabha

CombineCS The Extra Step

*Initialize*

Q3) Using a constructor to specify the type conversion is convenient but has implications that can be undesirable in :

- (i) There can be no implicit conversion from a user defined type to basic type.
- (ii) It is not possible to specify a conversion from a new type to an old one without modifying the declaration for the old one.
- (iii) It is not possible to have a constructor with a single argument without also having a conversion
- (iv) ALL

Rashmi Prabha

CombineCS The Extra Step

Q3) Using a constructor to specify the type conversion is convenient but has implications that can be undesirable in :

*basic → user defined  
Student ( ) 'impli*

- (i) There can be no implicit conversion from a user defined type to basic type.
- (ii) It is not possible to specify a conversion from a new type to an old one without modifying the declaration for the old one.
- (iii) It is not possible to have a constructor with a single argument without also having a conversion

*(iv) ALL*
